

Implementation Framework: Early Adopters

Please use this framework to document your key actions to ensure a successful implementation.

Please document who the early adopters are that you need to engage with within your organisation as part of the implementation process.	
Name of group	
Role within your organisation	
What makes this group essential to the successful integration of your solution?	
How will this group disseminate the relative advantage of your solution to the wider organisation?	
How are you going to ensure that this group understands the functionality of your solution?	
How will you use this group to integrate your solution into the practice of the wider organisation?	
What is the next stage of evaluating your solution to show the value to the wider organisation?
