

Approaches to changing practice

Please use this form to document your implementation plans to support the adoption for your simulation solution.

1. Relative Advantage - How are you going to communicate the key advantages of your solution in relation to how it will improve practice within your local setting?

2. Compatibility - How will you ensure that your solution speaks to the values and mission of your organisation?

3. Complexity - How are you going to ensure that your solution is engaging and easy to use?

helping save lives

4. Trialability -

- What aspects of your solution do you want to evaluate?
- What are the key questions this evaluation will answer?
- Who do you need to engage within your clinical setting to ensure that your evaluation is successful

5. Observability – Using Kirkpatrick’s Model please describe the evaluation process that will allow you to observe changes in practice and communicate the value of your solution.
